UMF Guidance Note : Standard Template for Umbilical Installation Parameters

The UMF has published a guidance note providing a list of information to be provided between umbilical manufacturer and installation contractor. The template, which was developed by the UMF following a workshop with major installers, includes the relevant parameters that are required when developing the methodology and vessel equipment for installation of a specific umbilical design.

The document is available as a free download from www.umf.as .

UMF : Founded in 2001 the Umbilical Manufacturers' Federation is the trade association of umbilical producers.
