### **UMF Operator Meeting**

The UMF held a productive workshop in June 2018 with 7 major Oil & Gas Operators. The aim of the meeting was to explore Operators' experiences in the application of umbilical systems. A wide variety of topics were explored ranging from specifications through to umbilical technology trends. All participants commented that the meeting had been very useful in promoting dialogue between Operators and umbilical manufacturers, and that follow up events should be planned. The output from the discussions will be used in the shaping of future UMF initiatives.

*UMF : Founded in 2001 the Umbilical Manufacturers' Federation is the trade association of umbilical producers.*
